

THORSTEN FELLER | BIOGRAPHY

Thorsten's life story can indeed be regarded as the classic lateral entry story. Born and raised in Berlin, he began to take guitar lessons at the age of 12. A passion was born. At a time when the electronic techno sounds already gained a foothold, an alternative breeze of the 1970s was blowing at Thorsten's school; Long hair and guitar music were considered fashionable. From 1989 till 1992, Thorsten played in the school drama group. Having had fantastic and successful times on stage formed his strong desire to become an actor at that point. However, in 1992 Thorsten complied with his parent's demands to do something respectable and began to study politics. In addition to his studies, Thorsten worked as a model and played in a band for many years in order to finance all the journeys which drove him around the planet year for year until today. After having been featured in the successful French cinema film PÉDAL DOUCE in 1996, Thorsten was chosen among 200 contestants for one of the leading roles for the RTL Comedy Show HAPPINESS. Since then, Thorsten was working successfully on many television and feature film productions until today.
